PROFESSIONAL SUMMARY

Entry-level DevOps/Cloud Engineer with AWS Cloud Practitioner certification and 2026 Electronics & Telecommunication Engineering degree. Built and deployed 2 end-to-end CI/CD pipelines on AWS using Docker, GitHub Actions, and Linux to automate secure, repeatable deployments.

TECHNICAL SKILLS

Cloud (AWS): EC2, VPC, IAM, S3, Elastic Load Balancer, CloudWatch, Security Groups

CI/CD & Containers: GitHub Actions, Docker, Docker Compose, Git

Infrastructure as Code: Terraform

Scripting & Operating Systems: Bash, Linux (Ubuntu), SSH, Networking Fundamentals

Monitoring: AWS CloudWatch

PROJECTS

Two-Tier Application — AWS Cloud Deployment & CI/CD *AWS, Docker, CI/CD*

- Deployed a two-tier application consisting of an application tier and MySQL database tier on AWS EC2 using Docker Compose.
- Containerized the application and database services to provide a consistent and reproducible deployment environment.
- Implemented GitHub Actions CI/CD to automate application testing, build, and Docker image publishing to GitHub Container Registry.
- Configured AWS Security Groups and environment-based secrets to control network access and protect application credentials.
- Used Linux and SSH for EC2 server administration, troubleshooting, and application deployment operations.

AWS Infrastructure Provisioning & Deployment using Terraform *Terraform, AWS, EC2, VPC, IAM, GitHub Actions*

- Provisioned AWS infrastructure using Terraform, implementing Infrastructure as Code (IaC) for repeatable and version-controlled cloud deployments.
- Automated provisioning of VPC networking, subnets, security groups, IAM roles, and EC2 instances using reusable Terraform configurations.
- Implemented a GitHub Actions workflow to validate, plan, and apply Terraform configurations, enabling automated infrastructure deployment through CI/CD.
